THE ADVANTAGES

CEMENT ROOFING

POSSESSES OVER TIN, IRON AND STEEL ROOFING
IT CANNOT RUST

Gases, fumes, moisture, coal soot and smoke cannot injure or affect CEMENT ROOFING. It is better adapted for application over uneven surfaces, such as old shingles or metal roofs, obviating the expense of removing the same. It will not rattle from wind and storm, nor create any noise from rain falling upon it. The materials used in cement roofing are the best non-conductors of heat and cold known; therefore it will keep the building warmer in winter and cooler in summer than a metal roof. Samples and full particulars mailed on request.

Cuba's Crop Is Short And High Sugar Prices Promised

Willitt & Gray's Sugar Circular for May 26 gives the following review of the sugar market:

Raws.—Sharp advances have been made in both raws and refined during the week under review. The immediate cause for this has been Cuba, and the setting in of its rainy season bringing the crop to a close much earlier than anticipated. Last week we reported 118 centrals grinding, while this week the number has been summarily reduced by the rains to only 10 centrals grinding. This reduction means a very decided change for the worse in the estimates of the final outcome of the Cuba crop. Even should a period of fair weather set in, temporarily, it is not likely that the estates which have stopped grinding will again start up for, under the circumstances prevailing in the island at this moment, this could not prove profitable to hardly any estate, so that the Cuba crop season must be looked upon as virtually over, and it only remains now to figure up what the actual production will be.

It looks from the present standpoint to be less than 1,000,000 tons or not much larger, if any, than the last season's crop. Final figures, however, must be awaited before certainty is assured. Of course, such a sharp reduction in crop figures, when they might have been extended largely by continued fair weather, makes radical difference in the price problem and status of the theory of a very extraordinary and unusual advance in quotations among the possibilities of the present campaign. Thus far, the week already shows an advance from the close of last week when spot centrifugals, 96 test, were selling at 37c, duty paid, to the close of this week, with sales completed at equal to 35c, duty paid, for nearby sugars and at 23c for 95 test for shipment, equal to 4.01, duty paid, basis 96 test, and 23c, asked with probability of soon being paid for 96 test, following the other noted advances from week to week for the past month or more.

European markets have not kept pace with the advances here. They are only now at the parity of our market, while a month or so ago they were 1/2c per lb. above our parity. Their rise has been but about 1/2c, per lb., therefore, against our rise of 1/2c, and with American demand going to Europe for beet sugars, as it must do in the near future, there is to be expected a similar rapid movement on the other side, where conditions are much more speculative than here by reason of the network of Sugar Exchanges over Europe.

At the close 25c, c. and f. for 95 test, is the best offering made and with buyers hesitating a little.

Java sugars have lately been sold to American refiners, probably to the extent of four or five cargoes, at as high as 10c, c. and f. for July and August shipment (September and October arrival), equal to 3.95c, duty paid, for 96 test. Holders are now asking 10c, 15c, c. and f. (3.95c, duty paid) for August-September shipment, and 10c, 3d, c. and f. for July shipment.

European markets opened the week at 9s. 6d. for beet, closing at the same quotation. A notable feature was the transactions in future beet contracts for American buyers, July contracts being taken at 9s. 8 1/2d., September at 9s. 9 1/2d., f. o. b. Hamburg. This is the first time during the present campaign that such contracts could be obtained at the parity of the American market, which, naturally has been the sole cause of the absence of speculative buying of beet sugars up to the present time, buyers in America not being disposed to take much, if any, interest in beet contracts when held as they have been throughout this season about 1/2c per lb. above our American markets. Whether further interest will be taken in beet sugars here, by speculators, remains to be seen, but refiners, it would seem, must enter the European markets for supplies before very long, a few purchases having already been made, but not of special significance.

Available Supplies to October First.—On the 12th inst., we published a table, showing the estimated supplies of cane sugars available for American refiners up to October 1st, when the new beet crop will be coming to market, based upon the estimate of 1,120,000 tons Cuba crop. We give below, revised figures based upon the reduced estimate of 1,000,000 tons production in Cuba this season. The balance of supply from the island this year is now calculated to be 345,000 tons. From this amount should be deducted 26,400 tons for local consumption for the balance of the year; also 50,000 tons, which may be carried over into November or December by tenacious holders and 100,000 tons which will probably be required by New Orleans, leaving 163,600 tons estimated available supply for the United States, four ports, with 20,000 tons now adrift, making a total of Cuban sugars, 183,600 tons.

Estimated receipts—Four Ports—May 26th to October 1st, 1904:

	Tons.
From Cuba	183,600
Hawaii	125,000
Porto Rico and Philippines	40,000
West Indies, Peru, etc.	50,000
Java (estimated purchases by refiners and speculators thus far)	125,000
	523,600

Add total stock United States

Four Ports May 26th 294,857

Deduct working stock for refiners October 1st 150,000

Estimated requirements for melting May 26th to Oct. 1 760,000

Deficiency to be obtained principally from Java and Europe 176,513

HEBREWS TO NEW YORK.

London, May 5.—According to a London morning paper the East End, or that portion of it which is called Yiddish, is all excitement over the joyful news displayed in the windows of small shipping offices in side streets of the Ghetto, "£2 to New York."

Far-sighted residents go so far as to express the opinion that \$10 would be well spent to send across the Atlantic those of their relatives who do not promise to make headway in this country. The result is an unusually heavy booking of passengers by the Red Star line and one man alone has sold 200 tickets in two days.

Tomorrow 800 Hebrews will leave for New York and Canada by the steamship Kronland of the Red Star Company.

"For Rent" cards on sale at The Bulletin office.

Take Notice

Sec. 13. Each precinct club shall meet biennially at 7:30 p. m. on the second Friday in June, or upon the call of the County, District or Territorial Central Committee or the executive committees thereof and shall then make nominations for officers of the club; and on the fourth Friday in June they shall meet at the same hour and elect officers for the ensuing two years; and on the fourth Friday in July they shall meet at the same hour and make nominations for members of the district committee and delegates to the County and Territorial Convention to be voted for at a primary to be held on the first Saturday in August between the hours of 2 and 8 o'clock p. m., or upon call of the Territorial Central Committee, or its Executive Committee.

Officers and members of all Precinct Clubs throughout the Territory are requested to observe the above rule, but owing to the shortness of time the meeting for the purpose of nominating club officers only may be postponed for one week.

C. L. CRABBE, Chairman.

Honolulu, June 6, '04. 2785-1W

HEALTH BOARD MEETS

ADULTERATED MILK DISCOVERED IN HILO

FOOD COMMISSIONER DUNCAN REPORTS ON ANALYSES OF MILK AND WATER SAMPLES.

At the meeting of the Board of Health held yesterday afternoon Dr. W. H. Mays, chairman of the committee on cemeteries, submitted the following report:

"Your Committee on Cemeteries, to whom was referred the request of Rev. M. E. Silva for permission to bury in Lot 2 of the Kalaepohaku cemetery, report as follows:

"We recommend that such permission be granted, provided that each and every interment be recorded in a book kept for that purpose, and correspondingly numbered on a plot of said burial lot. And provided also that each grave be accurately marked by a stake or post at head and foot, and numbered thereon."

It was decided that the permission sought for by Mr. Silva could not consistently be refused.

Food Commissioner Duncan reported that he had examined 120 milk samples, nine of which were from Hilo. Of the Hilo samples there were found to be below standard and Inspector Donnan of Hilo was notified to see to it that adulteration was stopped. The Honolulu milk dealers from whom samples of inferior quality were obtained were as follows: Punahoa Dairy, Nagatani, Tavares, Lloyd, Jap. for G. Holt, Jap. for A. D. Costa, V. Souza, Matsunaba, A. Souza, Jap. for H. Bell, Mosagava and Yosteda.

The food commissioner further reported as follows:

Light waters from the Molokai district were analyzed; the result of their examination will be given in a separate report.

Three waters from Kaneohe were examined on private complaint, one being a well water, the other two from the streams and used by residents of that locality. The Commissioner gives the analyses of these waters, being respectively from a well, Alamahi stream and Punahala stream, saying of the results: "Alamahi stream is reported as flowing through an uncontaminated district. The analysis shows it to be a good water and it may be taken as an example of a pure water from that district. Comparing the other waters with it the analysis shows them to be contaminated. The parties interested were notified and I have since learned that they have taken steps to obtain a purer water supply."

"The amount of carbon dioxide in four samples of air was determined for the Division of Sanitation."

"The following foods were examined, condemned and ordered destroyed as not fit for food: Twenty-four cases Chinese food products, consisting of canned shrimps, etc.; five boxes raisins, one box shrimps, fifty boxes apricots, twenty-seven boxes prunes, three boxes peaches. Total, 110."

"Five samples food were analyzed but the examination of this class is not finished, so the report on them is held over until next month."

A report from Dr. Cofer was read giving the health conditions in the Orient as follows:

Hongkong, two weeks to May 12—Cholera cases, 1; deaths, 1. Smallpox cases, 5; deaths, 3. Plague cases, 49; deaths, 46.
Shanghai, two weeks to May 14—Smallpox cases, 1; deaths, 12.
Nagasaki, two weeks to May 17—Smallpox cases, 40; deaths, 18.
Kobe, two weeks to May 20—Clean.
Yokohama, two weeks to May 22—Clean.

ATHLETES TO ST. LOUIS.

New York, June 1.—A dozen prominent athletes composing the New York Athletic Club team will start for St. Louis to compete in the amateur athletic Union championships at the Exposition.

Among those on the team are P. J. Walsh, champion 220 yard runner; Alexander Grant, half mile runner; W. McLanahan and H. L. Gardner, who will compete in the pole vault; S. S. Jones, high jumper; James S. Mitchell, hammer and weight thrower; Richard Sheldon, who also will compete in the shot put; John Dewitt, intercollegiate hammer thrower; Mahoney, Munson, Fratt, Pilgrim and Ballantine.

COOLIES WERE DISSATISFIED.

Victoria, B. C., June 1.—Colonel Hamilton, British Government special commissioner to the Imperial Chinese Government, arrived on the steamship Empress of Japan last night after successfully negotiating with the Chinese Government for the sending of upwards of half a million coolies to work in the South African diamond and gold mines. Some days before the Empress left Hongkong a mutiny broke out among the coolies in their big pen on the Kowloon side. They were dissatisfied with the conditions under which they were to be deported and began to smash things. The troops were called out and the mutiny was suppressed. A number of coolies were injured in the melee.

As The Bulletin gives its employees a holiday on June 11th, the Comic Supplement with Simon as Queen of the May will appear with Friday's issue.

Advantages of Westinghouse Motors

The advantages of electrical transmission of power through the Westinghouse Motor are numerous, but the more important may be treated under the following heads, viz.:

1. Reliability.
2. Convenience and Flexibility.
3. Saving of Power.
4. Sanitary Improvement.
5. Increased Output.
6. Decreased Cost of Maintenance.

A full explanation of the above points will be cheerfully given at our office or we will call and see you.

Telephonine

THE ONLY PERFECT ANTISEPTIC ATTACHMENT FOR TELEPHONES.

WHAT IT IS AND DOES.

It is a necessity—not a luxury. It destroys disease germs in Phone mouthpieces.

It renders telephoning safe, pleasant and agreeable.

It KEEPS Phone mouthpieces disinfected, deodorized and free from dust particles.

It prevents infection and nausea, frequently caused by using unclean mouthpieces.

It is a recognized fact that Tuberculosis, Tonsillitis, Pharyngitis, Diphtheria, La Grippe and allied diseases may originate in the mouth and are conveyed by emanations therefrom.

It is a fact, that decay and putrefaction of the teeth and gums are caused by disease germs.

It is impossible for any Telephone Company to keep disease germs and dust out of your mouthpiece, as Phone is delivered to you new and in a wholesome condition.

E. R. BIVEN, Agent.
